

UNRELENTING PRECISION
12K DPI
 ROCCAT OWLEYE
 OPTICAL SENSOR

CONGRATULATIONS!

You are now the proud owner of a ROCCAT® Leadr! The Leadr is the flexible, competitive-grade wireless gaming mouse that suits every style and every game. Featuring an X-Celerator analog thumb paddle and an intuitively placed fin switch, its multi-button layout provides unrivaled command power. RGB illumination in 16.8m colors plus countless additional features combine to make this mouse a king.

The Leadr is wireless royalty!

WIRELESS WITHOUT COMPROMISE

The freedom of wireless with the performance of wired – that's the Leadr. Featuring zero lag and with virtually zero latency, it combines consistent tracking and pinpoint precision for gamers who won't settle for second best.

ROCCAT® OWLEYE OPTICAL SENSOR

World-beating 12k dpi optical sensor. Translating your mouse movements on screen with 1:1 accuracy, Owl-Eye delivers unrelenting pointer precision making it a leading optical sensor and a prime choice for competitive gamers.

CHARGING DOCK PLUS TOP-UP CABLE

A weapon is only as good as the holster holding it. With a premium docking stand featuring charging and status LEDs, the Leadr is ready and primed. Low battery? Connect the top-up cable to carry on gaming. Freedom without compromise.

FEDERAL COMMUNICATION COMMISSION INTERFERENCE STATEMENT:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -Reorient or relocate the receiving antenna. -Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help.

BSMI RoHS information: <http://bsmi.roccat.org>
 FCC Caution: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference that may cause undesired operation. Interference received, including interference that may cause undesired operation.

WHAT'S ROCCAT® SWARM?

Swarm provides next-level ROCCAT® product integration. It works a unified driver suite where you can keep tabs on all of your ROCCAT® devices in one place. Say goodbye to multiple tray icons – with Swarm you have a veritable gaming command HQ for every weapon in your arsenal.

WHAT'S EASY-SHIFT[+]™?

The Leadr features world famous Easy-Shift[+]™ button duplicator technology. It lets you assign a secondary function to your mouse buttons, for a total of 31 possible functions. These secondary functions can be activated by pressing a button while holding down the dedicated Easy-Shift[+]™ button. This gives you the power to pack a massive amount of quickly-accessible control into a clean, uncluttered space.
